

Fulvic Acid

Backed by Science. Loved by Nature.

BioStimulant

A powerful natural chelator and plant growth promotor.

Why use *Fulvic Acid*?

Features	Benefits
Concentrated, high quality extracts of Fulvic Acid	Improved absorption and utilisation of available nutrients
A powerful, all natural, tried and tested agricultural input	Enhanced photosynthesis, especially beneficial during prolonged cloudy conditions
Known for its benefits as a natural chelator, plant growth promotor and detoxifying agent	Enhanced cell division and elongation leading to improved root development
Available in an easy to use 8% liquid formulation or a 70% cost effective and freight friendly powder formulation	Improved breakdown and removal of toxic elements

Application instructions:

Use as a natural chelator by combining with foliar application of plant nutrients.

Soil Application	Liquid	5-10 L per Ha minimum dilution 1:20
Soil Application	Powder	2-5 kg per Ha applied as part of fertiliser blend
Foliar Application	Liquid	1-3 L Ha minimum dilution 1:100
Foliar Application	Powder	DIY Fulvic Acid Liquid - 120 g per L water, mix with vigorous agitation and filter insoluble component before use. Apply as per liquid recommendation
