FUNGICIDE

A lubricant to be added to mechanical planters when planting treated or untreated seeds, with added benefit of *Eco-T*<sup>®</sup>, a fungal inoculant for the control of crop root diseases and for enhanced plant growth.

**Active ingredient:** *Trichoderma asperellum* strain kd  
(Min 2 x 10<sup>7</sup> spores per gram)

**DISCLAIMER:** Although this product has been tested under a variety of conditions, the supplier does not warrant that it will be efficacious under all conditions. Because the active agent is a living organism, its action may be affected by storage, handling, climatic or soil conditions. The supplier is also not responsible for poor performance of the product due to failure of the user to follow the label instructions. This naturally-occurring organism should not cause damage to crops, vegetation or the environment, nor harm to man and animals. However, in the unlikely event of this happening, the supplier does not accept responsibility for any damage that may occur.

## IMPORTANT POINTS TO REMEMBER

- Remember you are working with a living organism.
- Store at 4 – 10°C for maximum shelf-life.
- Do not leave the powder or mixture standing in the sun.
- Use within 6 hours of mixing.

## DIRECTIONS FOR USE

Crop	Dosage	Remarks
Row crops such as maize and soya	1g/kg seed. Min 25g/ha (1 scoop)	Apply at planting. Mix directly into seed hopper of planter. Fill half the hopper with seed, add and mix in half the product. Add the balance of the seed and mix in the balance of the product.

## COMPATIBILITY

- Do not mix with any agrochemicals without first consulting your sales representative.
