

Specially formulated with a unique combination of silica, calcium and boron for the maintenance of healthy roots and plants.

Provides benefits in the early growth stages as well as on established crops.

Why use V¹² Initiate®?

- Triggers uptake of all nutrients
- Slow release silica and calcium means constant supply over time
- Full range of plant-available micronutrients, balanced with selected stimulants
- Offers key nutrients over time while supporting rhizosphere microorganisms

How does it work?

- Silica, calcium and boron are uniquely combined in the same formulation
- Silica, calcium and boron work together to provide cellular and structural strength
- The product enables uptake of other nutrients, including micronutrients

Preliminary visual results in Brits (1st year)

Monthly applications of V¹² Initiate as a drench

- Improved set (clusters and more fruit)
- Even set
- Good lateral branch growth = skeleton for following years set
- Retention of style
- Reduced navel end splitting
- Limited sunburn

Good lateral branch growth

1	2	3	4	5	6	7	8	9
28 May	24 Jun	30 July	30 Aug	26 Sept	29 Oct	26 Nov	30 Dec	28 Jan

- 770 ml V¹² Initiate per 300 L water
- 2.56 ml per 1 L water
- 2 L mixture applied on either side of tree
~10 ml V¹² Initiate per tree
- Tree spacing 3 m x 6 m

SIMPLE AND EFFECTIVE!

Application Guidelines

Apply by drenching 2 L mixture on each side of the tree.

Available in: 1 kg, 5 kg, 30 kg and 1300 Kg

Silica can be deposited below the cuticle forming a mechanical barrier between the plant and its environment.
